

Pravin Dnyandeo Gawade

☎ +91 9960173015 | ✉ gawade.pravin@gmail.com | 📍 Pune, India

Professional Summary

Senior Software Engineer with 18+ years of experience in C/C++, VC++(MFC), Embedded programming, Mobile App development and Cross-platform application development.

Expert in designing high-performance desktop and IoT solutions, with strong skills in multi-threading, system-level programming, and troubleshooting complex production issues.

Proven track record in product development, legacy modernization, and leading small teams. Experienced in working with global clients and delivering scalable, reliable software solutions.

Technical Skills

Languages: C, C++, VC++, Objective-C, Kotlin, Swift

Frameworks/Tools: Win32, MFC, STL, Cocoa, UIKit, SwiftUI

Platforms: Windows, macOS, Android, iOS

Concepts: OOPs, Multi-threading, Socket Programming (TCP/IP, UDP), RTSP,
Embedded Systems, Firmware Development, RTOS, IoT, Mobile App Development

Tools: Visual Studio, XCode, Android Studio, Visual Studio Code, CVS, VSS

Professional Experience

Info-Bridge Solutions Pvt. Ltd., Pune

Client: R-HUB Communications, Inc. (San Jose, CA, USA)

Senior Software Engineer | Sept 2010 – Present

TurboMeeting (Video Conferencing Platform)

- Led defect resolution team of 3–4 engineers, ensuring timely delivery of fixes
- Designed and developed new features and application modules using VC++ (Win32, MFC)
- Worked on cross-platform application using Objective-C (Cocoa, UIKit), Android
- Troubleshot complex production issues and provided cross-team technical support
- Performed code reviews and contributed to architecture improvements

TurboTracker (IoT / Embedded System)

- Designed and developed firmware for low-power IoT devices using C++
- Implemented LoRa-based mesh communication for long-range device networking
- Developed mobile applications for Android (Kotlin) and iOS (SwiftUI) for device configuration and tracking

- Optimized communication protocols to improve reliability in multi-node environments
- Conducted hardware testing, debugging, and validation for real-world deployment

Multi-Protocol IM Client

- Researched and implemented messaging protocols for MSN and Yahoo integration
- Analyzed network communication using monitoring tools
- Developed client-side messaging features in C++/MFC

Speaker Timer Pro

- Enhanced application features and implemented licensing functionality
- Resolved bugs and improved overall application stability

iASYS Technologies Pvt. Ltd., Pune

Senior Software Engineer | Oct 2007 – Aug 2010

Orbit-E / Orbit-X (Automotive Diagnostics Tools)

- Designed and developed desktop applications using VC++ (MFC)
- Built dynamic data visualization tools for large-scale automotive test data
- Implemented XML-based report generation system with database integration
- Improved performance for handling large datasets using dynamic loading techniques
- Collaborated with clients including BASF, Eicher Motors, Tata Motors, and ARAI

Key Achievements

- Led defect-fixing team improving product stability and reducing critical issues
- Designed scalable IoT communication system using LoRa mesh networking
- Contributed to long-term product (TurboMeeting) used by global clients
- Improved performance and reliability of legacy systems through optimization

Education

M.Sc. Computer Science – University of Pune, 2007

B.Sc. Computer Science – University of Pune

Additional Information

- Experience working with international clients (USA)
- Visited to R-HUB Communications Inc., San Jose, CA, USA for business meeting.
- Strong analytical and troubleshooting skills
- Effective mentor and team collaborator
