

To Whom It May Concern,

May 4, 2026

I am honored to write this letter of recommendation for **Pravin**, with whom I have had the privilege of working closely since **August 2010**, spanning nearly two decades of collaboration on a wide range of advanced software, telecommunications, and embedded systems projects.

Over the course of our long professional relationship, Pravin has consistently demonstrated exceptional technical expertise, strong leadership, and a rare ability to solve highly complex engineering challenges across multiple technology domains.

Pravin initially played a key role in the development of sophisticated telecommunications systems, including a highly advanced video and web conferencing platform designed to operate seamlessly across multiple platforms, including Windows PCs, Mac computers, iOS devices, and Android devices. In this work, he contributed extensively to software design, implementation, optimization, and troubleshooting. His ability to develop robust, scalable, and cross-platform solutions using technologies such as C++, MFC, Java, and SQL was instrumental to the success of these products.

In later years, Pravin expanded his contributions into embedded systems and IoT development. He has implemented numerous firmware projects involving video, GPS, and wireless communication applications built on camera chipsets, GPS modules, LoRa, and ESP32 platforms. His work has included low-level firmware development, hardware integration, system optimization, and field validation.

One of Pravin's most impressive achievements has been his design and implementation of mesh-based RF MESH networking communication protocols, where he developed deep skills in wireless communication, distributed networking, protocol design, reliability optimization, and real-world deployment challenges.

Throughout our many years of collaboration, Pravin has consistently shown:

- Exceptional software and firmware engineering skills
- Deep understanding of video telecommunications and wireless networking
- Strong system design and problem-solving abilities
- Expertise in cross-platform application development
- Advanced knowledge of embedded systems and RF communication
- High standards of quality, reliability, and professionalism

- The ability to work independently while also mentoring and collaborating effectively with others

Beyond his technical excellence, Pravin is dependable, thoughtful, and fully committed to delivering results. His contributions have had a lasting impact on multiple generations of products and technology initiatives.

I offer my highest recommendation for Pravin for any senior engineering, software architecture, embedded systems, telecommunications, IoT, or technical leadership role. I am confident that he will bring outstanding value, innovation, and leadership to any organization.

Please feel free to contact me if additional information is needed.

Sincerely,

A handwritten signature in black ink, appearing to read 'John Mao'.

John Mao, Ph.D.

CTO of RHUB Communications, Inc.
